Notes

Keep trying float, and find ways to make two links with different styles.

RUNOOB.COM

源代码 (显示异常):

点击运行

```
<!DOCTYPE html>
<html>
<head>
<meta charset="utf-8">
<title>菜鸟教程(runoob.com)</title>
<style>
img
{
    float:right;
    border:1px dotted black;
    margin:0px 0px 15px 20px;
}
</style>
</head>

<body>
<p>
    在下面的段落中,图像将向右浮动。黑色虚线边界添加到图像。
我们还添加了边缘的0 px的顶部和右侧 margin,15 px底部margin,和20 px左侧的margin的图像。{
<p>
<img src="logocss.gif" width="95" height="84" />
This is some text. This is some text. This is some text.
This is some text. This is some text. This is some text.
This is some text. This is some text. This is some text.
This is some text. This is some text. This is some text.
This is some text. This is some text. This is some text.
This is some text. This is some text. This is some text.
This is some text. This is some text. This is some text.
This is some text. This is some text. This is some text.
This is some text. This is some text. This is some text.
This is some text. This is some text. This is some text.
</p>
</body>
```

运行结果

在下面的段落中,图像将向右浮动。黑色虚线边界添加到图像。 我们还添加了边缘的0 px的顶部和右侧 margin,15 px底部margin,和20 px左侧的margin的图像。使得文本远离图片:

This is some text. This is some text.

实例

在 HTML 文档中使用 class 属性:

```
<html>
<head>
<style type="text/css">
h1.intro {color:blue;}
p.important {color:green;}
</style>
</head>

<body>
<h1 class="intro">Header 1</h1>
<p>A paragraph.</p>
<p class="important">Note that this is an important paragraph.</p>
</body>
</html>
```

亲自试一试

（可以在本页底部找到更多实例）

定义和用法

class 属性规定元素的类名（classname）。

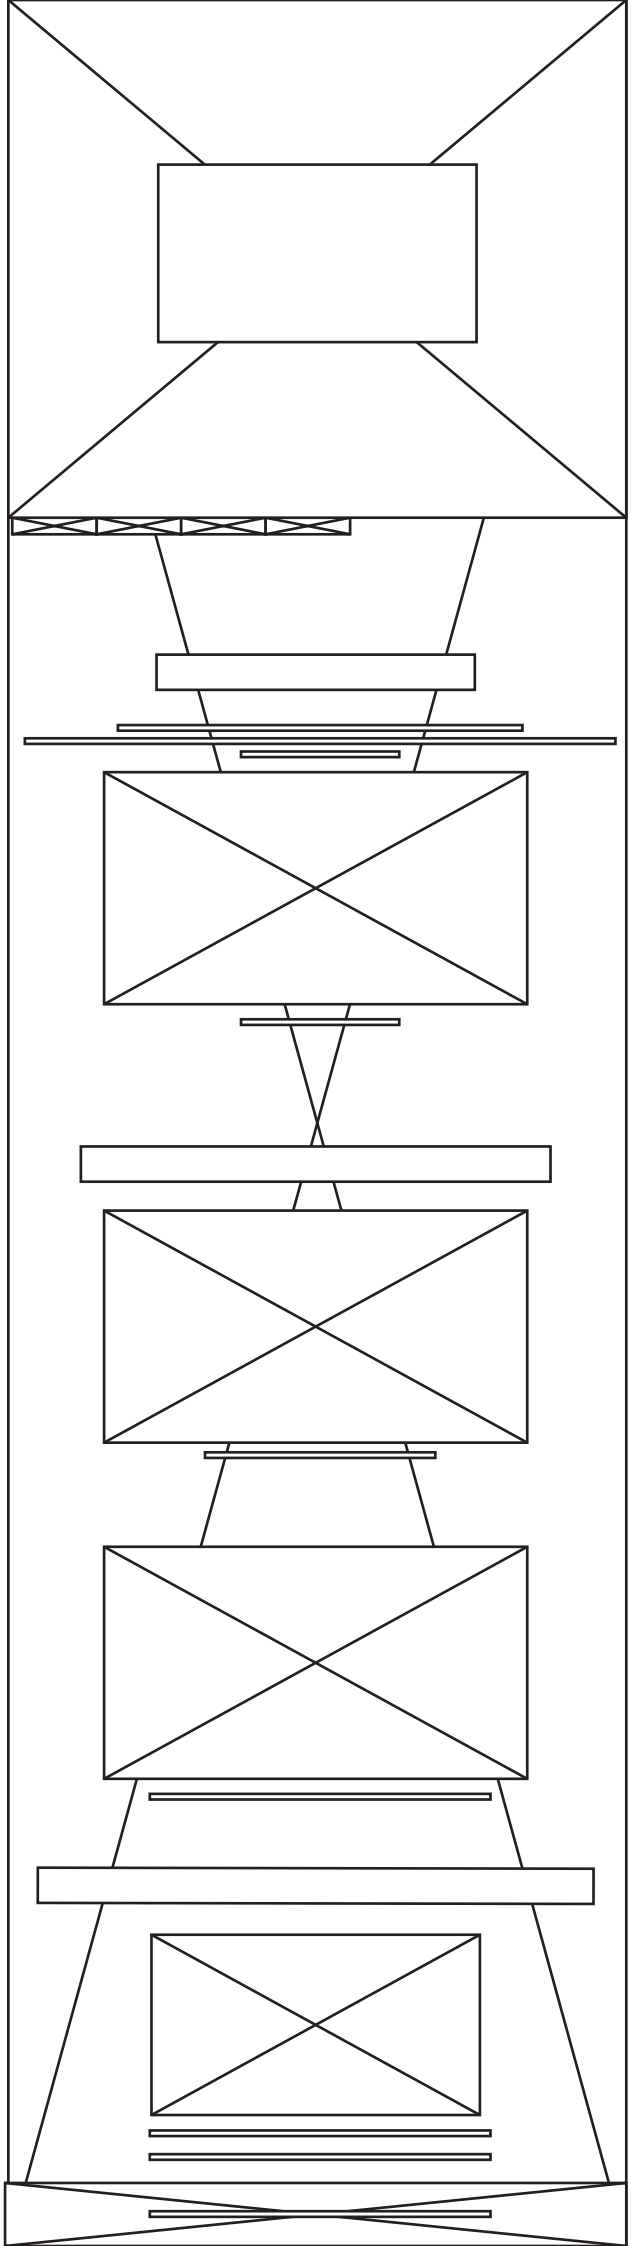
class 属性大多数时候用于指向样式表中的类（class）。不过，也可以利用它通过 JavaScript 来改变带有指定 class 的 HTML 元素。

提示和注释

注释： class 属性不能在以下 HTML 元素中使用：base, head, html, meta, param, script, style 以及 title。

提示： 可以给 HTML 元素赋予多个 class，例如：。这么做可以把若干个 CSS 类合并到一个 HTML 元素。

提示： 类名不能以数字开头！只有 Internet Explorer 支持这种做法。



PATTERN 1 PATTERN 2 PATTERN 3 PATTERN 4

About Kamen Rider W

In order to maintain the peace of Windy City, the private detective・Hidari Shotaro and his knowledgeable companion・Philip together transformed into Kamen Rider W, and fought against the monster named Dopant that appeared one after another.

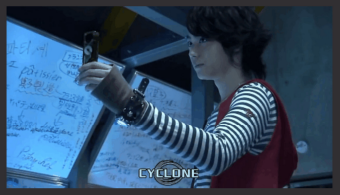
this is Kamen Rider W

Kamen Rider W's Characteristics

Kamen Rider W is transformed by two people.

As he changes form, the colors on both sides of his body will also change.

Who transformed into Kamen Rider W?



左翔太郎（Hidari Shōtarō）is the left half of Kamen RiderW(Man with hat)

Philip (フィリップ Firippu) is the right half of Kamen Rider W
